#### **High-Precision Bellows Coupling Series BK4 for Fanuc motors**

Taking up the challenge for greater technical demands in modern machine design and construction, R+W has developed the **BK4** series Bellows Couplings.

These unique couplings are specifically designed for assembly to **Fanuc** motors.

The stainless steel bellows exhibits very high torsional rigidity with zero backlash. The bellows can compensate for axial, angular, and lateral misalignment simultaneously and has a very low moment of inertia.

Sizes are available for torque capacities ranging from 15 to 80 Nm (133 to 708 in. lbs.).

Contact R+W Antriebselemente GmbH at 0049/9372/98640 for more information or visit our website at [www.rwcouplings.com](http://www.rwcouplings.com)
